A: This is a Perl regular expression which matches: A character between 0 and 1 time A hyphen (-) between 0 and 1 time A period (.) between 0 and 0 times A comma (,) between 0 and 1 times A forward slash (/) between 1 and 0 times A colon (:) between 1 and 0 times A space () between 1 and 0 times An open bracket ([) between 0 and 1 times A close bracket (]) between 0 and 1 times A digit (0-9) between 0 and 1 times As you can see there are no way to tell how many times it should match for. Your guess might be good enough since the only thing you want is to know if there is any repetition, but there is no guarantee. It will depend on the exact text you have to parse, but it could also match for several times. Edit : I just noticed you asked for 1 and not more than 1. So you need this one: `^(?:[!@#$%^&*()+=~`{|}~\s\S])++$` If you want to allow 1 or more, you can use the `+` quantifier. Preoperative CT angiography detects arterial vessel involvement in patients with untreated giant intracranial aneurysms: the implications for endovascular treatment. To analyze preoperative computed tomographic angiography (CTA) findings of untreated giant intracranial aneurysms (GIAs) and their possible impact on endovascular techniques. We retrospectively reviewed the records and preoperative CTA findings of 98 consecutive patients with GIAs undergoing a subsequent endovascular treatment between January 2004 and May 2012. The CTA findings of these 98 patients were classified into four patterns (I, II, III, and IV), based on their vascular involvement on preoperative CTA images (flow voids, filling defects, a multiple arterial stenosis, and a distal arterial occlusion). Of a total of 98 patients, 82 were ruptured aneurysms and 16 were unruptured aneurysms. We compared the proportions of each pattern in patients with ruptured and unruptured aneurysms. The relationships between each pattern of preoperative CTA findings and outcome after endovascular therapy were examined. All giant aneurysms involved the parent artery. Among 16 unruptured
