The need to personalize spiritual values in the context of professional issues is highlighted by the author's description of her spiritual journey. Instinctive humanism was followed by an exploration of nontheistic approaches. In order to resolve the moral dilemma of mistreatment of animals, she adopted the practice of vegetarianism. To resolve the dilemma of treatment of those without access to health care, she became involved in the creation of a medical clinic. This account of her spiritual journey is addressed to other individuals and families committed to a meaningful life.The inventive subject matter relates generally to service robotics. More specifically, but not by way of limitation, the inventive subject matter relates to the provision of wireless charging for a robot. In the future, it is expected that there will be a growing market for robot service providers that are remotely located relative to a person that is sending robot services to provide food, music, clean up, etc. A robot service that travels from a location, such as a home, to the location where the person is in order to provide the service creates a lot of logistical problems and inefficiencies. These problems include
